## PROJECTS

### PODCAST PLATFORM

- Tech Stack: - **HTML, CSS, JavaScript, React.js, Redux-toolkit and Firebase.**
- It's a podcast listening and creating web app. For listening I have created custom audio player
- We can add recorded audio, display image and banner image of the podcast. It will be public as well so that others can also enjoy your podcast.
- I have used Firebase to store the podcast episodes. For authentication part I used Firebase so that anyone can Sign up and listen or create podcast.

### PICTURE BAZAAR

- Tech Stack: - **HTML, CSS, JavaScript and React.js.**
- In this project I used Unsplash API to fetch data with infinite scrolling feature.
- We can search images as per our choice and we can click on any image to download that image in high quality.

### CODE EDITOR

- Tech Stack: - **HTML, CSS, JavaScript and React.js.**
- In this project I used Monaco Editor which gives us a coding editor features.
- We have three languages html, css and JavaScript. Along with coding we get real time outcome of the code.

### ONLINE SHOPPING STORE

- Tech Stack: - **HTML, CSS and JavaScript.**
- In this project I used dummy product API.
- We can create Account and then we can make purchase as well by using add to cart facility. We can search by and title or by categories. For payment I used Razorpay test API.

## SKILLS

- JAVA
- SQL, MySQL Workbench
- GIT & GITHUB
- HTML, CSS
- JavaScript
- React.js, Redux, Redux-toolkit
- Firebase

## COURSEWORK

- Data Structure & Algorithm
- Object Oriented Programming
- Database Management System
- Web development

## EXPERIENCE

- **Analyst**  
In **Teleperformance** for Google shopping process.  
**2020-2022**
- **Customer Care Executive**  
In **Arvato** for Ebay.in process.  
**2015-2016**

## EDUCATION

- **B.A. Programme** from **Delhi University** - **2019**
- **12th** from **CBSE** - **2012**
- **10th** from **CBSE** - **2010**

## CERTIFICATES

- **SQL and MySQL** from **Udemy**
